CALENDAR

1908.

- JUNE 7. *Sunday*. Baccalaureate sermon by Professor Collins Denny, D. D. Vanderbilt University.
- JUNE 8. *Monday*, 4 P. M. Meeting of Board of Curators.
8 P. M. Contest for William A. Smith prize in oratory.
- JUNE 9. *Tuesday*, 8:30 A. M. . . . Meeting of Board of Curators.
3:30 P. M. . . . Academy declamation contest.
8:00 P. M. . . . Alumni address by W. M. Ledbetter, '91.
- JUNE 10. *Wednesday*, 10 A. M. . . Commencement exercises. Commencement address before the literary societies by Governor Joseph W. Folk.

Summer Vacation.

- SEPTEMBER 9. . . . *Wednesday*. First semester begins.
- SEPTEMBER 9, 10. Matriculation, registration, and examination of students.
- SEPTEMBER 11 *Friday*. Instruction begins in all departments.
- NOVEMBER 26 *Thursday*. Thanksgiving day.
- DECEMBER 23 *Wednesday*, 4:30 P. M. . Christmas recess begins.

1909.

- JANUARY 5. *Tuesday*, 8 A. M. Recitations resumed.
- JANUARY 23 *Saturday*. Midyear examinations close.
- JANUARY 26 *Tuesday*. Second semester begins.
- FEBRUARY 22 *Monday*. Washington's birthday.
- APRIL 5. *Monday*. Inter-Society declamation contest.
- APRIL 8. *Thursday*, 4:30 P. M. . . Easter vacation begins.
- APRIL 13. *Tuesday*, 8:00 A. M. . . . Recitations resumed.
- MAY 3. *Monday*. Anniversary Phi Alpha Society.
- MAY 15. *Saturday*. Prize essays and orations due.
- MAY 17. *Monday*. Anniversary of Aristotelian Society.
- MAY 25. *Tuesday*. Final examinations begin.
- JUNE 6-9. Commencement exercises.

BOARD OF CURATORS

BISHOP E. R. HENDRIX, *Chairman*
 SAMUEL CUPPLES, *Vice Chairman*
 REV. S. P. CRESAP, *Secretary*
 FRANK S. GROVES, *Treasurer*, 101 Massachusetts
 Building, Kansas City
 PROF. T. BERRY SMITH, *Financial Secretary*

College of

FACULTY

WILLIAM A. WEBB, President and Professor of English.

A. B., Vanderbilt University, 1891; Teaching Fellow, 1891-92; Assistant Teacher, Webb School, 1892-95; Graduate Student, University of Leipzig, 1895-97; Principal Central Academy, 1897-99; Graduate Student, University of Berlin, 1903-04. Professor of English, Central College, since 1899. President since 1907.

Chair endowed in honor of Mary Evans Barnes.

OLIVER H. P. CORPREW, Emeritus Professor of Greek and Latin.

A. M., Randolph-Macon College, 1849; Graduate in Schools of Mathematics, Modern Languages, and Moral Philosophy, University of Virginia; LL. D., Central College, 1897. Professor of Latin and Greek, Randolph-Macon College, 1865-71; Professor of Greek and Latin, Central College, 1871-1905; Emeritus Professor of Greek and Latin, Central College, since 1905.

Chair endowed by Robert A. Barnes.

T. BERRY SMITH, Professor of Chemistry and Physics.

A. B., Pritchett College, 1873; A. M., 1879; Graduate Student in Chemistry, Yale University, 1875-76. Instructor in Natural Sciences, Pritchett College, 1873-75; Professor of Chemistry and Physics, 1876-77; Professor of Chemistry, Geology, and Latin, State Normal, Kirksville, Mo., 1877-78; Professor of Greek and Latin, Pritchett College, 1878-79; Professor of Chemistry, Physics, and Mineralogy, Carleton College, 1879-80; Professor in McCune College, 1880-82; Professor of Natural Sciences, Pritchett College, 1882-86; Professor of Chemistry and Physics, Central College, since 1886; Acting President, 1901-03.

Chair endowed in honor of Richard M. Scruggs.

REV. RICHARD THOMPSON BOND, Professor of Mathematics and Astronomy.

A. M., Pritchett College, 1872. Teacher in Missouri, California, and Oregon, 1855-66; Assistant in Pritchett College, 1867-73; Professor of Mathematics, Washington University, 1873-77; President of Pritchett College and Professor of Mathematics, 1877-86; Professor of Mathematics and Astronomy, Central College, since 1886.

WILLIAM D. BASKETT, Professor of Modern Languages.

A. B., Central College, 1900; A. M., 1901; Graduate Student Johns Hopkins University, 1900-01; University of Berlin, 1905-06. Professor of Modern Languages, Central College, since 1902.

JOHN L. HOUSE, Professor of Biology and Geology.

Graduate of Indiana State Normal, 1899; A. B., Indiana University, 1903; Graduate Student, Summer Session of Indiana University, 1903 and 1907. Superintendent of Schools, Knox County, Ind., 1897-98; Principal of High School, Monrovia, Ind., 1899-1902; Superintendent of Schools, Wheatland, Ind., 1902-04; Professor of Science, State Normal School, Springfield, S. Dak., 1904-05; Professor of Biology and Geology, Central College, since 1905.

Chair endowed by George T. Hoagland.

HOMER C. HOCKETT, Professor of History and Economics.

B. L., University of Wisconsin, 1903; Graduate Scholar in American History, 1903-04; Fellow in American History, First Semester, 1904-05; Instructor in History, Second Semester, 1904-05; Lecturer in American History, Summer Session of the University of Illinois, 1905; Professor of History and Economics, Central College, since 1905.

DAVID R. LEE, Professor of Greek and Latin.

A. B., Albion College, 1895; A. M., 1901; Ph. D., University of Wisconsin, 1907; Graduate Student, University of Chicago, 1903-04; Student of Classical Antiquities, British Museum, London, and Rome, Summer of 1905. Assistant in Greek, Albion College, 1894-95; Acting Instructor in Greek and Latin, Sieboth-Kennedy School for Girls, Chicago, Ill., 1904, (one term); Instructor in Latin, Indiana University, 1904-05; Fellow in Latin, University of Wisconsin, 1905-06; Assistant in Latin, University of Wisconsin, 1906-07. Professor of Greek and Latin, Central College, since 1907.

JOHN J. TIGERT, Professor of Philosophy.

A. B., Vanderbilt University, 1904; A. B., Oxford, 1907; Rhodes Scholar, Oxford University, England, 1904-07. Professor of Philosophy, Central College, since 1907.

WILLIAM L. CLARKE, Principal of Central Academy.

A. B., Vanderbilt University, 1901. Assistant in Webb School, Bell Buckle, Tenn., 1901-06; Principal of Central Academy since 1906.

WORTH JAMES OSBURN, First Assistant in Central Academy.

A. B., Central College, 1903; A. M., Vanderbilt University, 1904; Fellow in Mathematics, 1904-05. Assistant in Central Academy since 1905.

THOMAS STARLING STAPLES, Second Assistant in Central Academy.

Ph. B., Emory College, 1904. Superintendent of Schools, Luthersville, Ga., 1904-05; Assistant in Central Academy since 1905.

GEORGE GARTON, Third Assistant in Central Academy and Director of the Gymnasium.

A. B., Central College, 1904. Instructor in Greek and French, Carleton College, 1904-05; Assistant in Central Academy since 1906.

EDNA EWIN, Assistant Librarian.

Graduate in Schools, Howard-Payne, 1897. Teacher in Public Schools, Fayette, Memphis and Louisiana; Assistant Librarian, Central College, since 1907.

F. C. BOWLES, A. M., Assistant in Central Academy, 1902-05.
A. W. VAUGHAN, B. S., Assistant in Central Academy, 1903-05.
W. W. MOONEY, A. M., Associate Professor of Ancient Languages,
1904-06.
MURRAY S. WILDMAN, Ph. D., Professor of History and Economics,
1904-05.
EDWARD E. WILDMAN, A. M., Professor of Biology and Geology, 1904-05.
F. A. BERNSTORF, A. B., Acting Professor of Modern Languages,
1905-06.
WILLIAM ROBERTSON, B. P., Principal Central Academy, 1905-06.
C. E. BOYD, A. M., Associate Professor of Greek and Latin, 1906-07.

CENTRAL COLLEGE

Historical Statement

On the first day of March, 1855, the legislature of Missouri approved the following act:

WHEREAS, The members of the Methodist Episcopal Church, South, in this State, at a convention of delegates held in St. Louis on the thirteenth of April, 1853, resolved to unite the means and efforts of their Church in the erection of one college of the highest order, at Fayette, in this State, and adopted the plan for that purpose; and, whereas, the two Conferences of the Church, pursuant to that plan, appointed a Board of Curators, composed of the following persons, appointed by the St. Louis Conference, that is to say: J. S. Waddell, Silas Silver, Charles W. Stewart, Edward J. Gay, Henry R. Walker, W. Adams, Esq., Dr. William Price, Rev. D. R. McAnally, J. K. Lacy, Thomas Johnson, N. Scarritt, J. Boyle, D. D., J. F. Truslow, J. T. Peery and James Mitchell; and of the following persons appointed by the Missouri Conference, that is to say: W. D. Swinney, Jo. Davis, C. C. P. Hill, Abiel Leonard, G. M. B. Maughs, M. D., Alexander Mitchell, John B. Clark, Rev. A. Monroe, R. P. Holt, William B. Watts, B. H. Spencer, P. M. Pinckard, J. F. Riggs, R. G. Loving and W. G. Caples; and, whereas, a quorum of these gentlemen met at Fayette on the ninth day of December, 1854, and appointed the following officers: J. Boyle, D. D., President; C. C. P. Hill, Vice-President; William T. Lucky, Secretary, and Adam Hendrix, Treasurer, and adopted such other measures in furtherance of the design as they deemed proper, and have procured a large sum of money to be subscribed, payable to Adam Hendrix, their Treasurer, and now desire an act incorporating the proposed institution; therefore,

Be it enacted by the General Assembly of the State of Missouri, as follows:

SECTION 1. The above mentioned persons, and their successors in office, are hereby constituted a body politic, with all the rights, powers and privileges usually enjoyed by colleges and universities of the highest grade, or which may be necessary and proper to enable them to promote the cause of learning in the State; and all acts of the Board of Curators aforesaid, in furtherance of the object of their appointment by the two Conferences, are hereby ratified and confirmed.

Under this charter, Central College was organized in Fayette, Howard County, Missouri, in the year 1857. In 1901, the three conferences of the Methodist Episcopal Church, South, in Missouri, concurrently approving such action, the necessary legal steps were taken to secure amendments to the charter. These provided as follows:

“The number of the Curators of this corporation shall be twenty-four, and one-third of the whole number of such Curators shall be appointed by each of the three conferences of the Methodist Episcopal Church, South, in Missouri—that is to say, the St. Louis Conference, the Missouri Conference, and the Southwest Missouri Conference of said Church.

“The term of office of each Curator hereafter appointed shall be four years and until his successor is appointed and qualified.

“One-third of the Curators hereafter appointed by each of said conferences shall be Alumni of Central College, and each Curator who is appointed as a representative of the Alumni of the College shall be selected by the conference appointing him from not less than three persons who shall have been nominated for that purpose by the Alumni of Central College to such conference.”

Purpose of the Institution

The purpose which the founders of Central College had in view was to afford to the young men and women under the direction of the Church an education which should be distinctively Christian. They did not propose to teach any system of theology, or to undertake the work of a theological seminary. The management of the College interprets Christianity from an evangelical standpoint, but its effort is to make its students cultured Christian men and women rather than Methodists.

We hold that if Christianity be what the Church believes it to be, its claims, its contents, and the grounds for believing it should form a part of the college curriculum, and our work is directed to the end that our students shall be trained religiously as well as intellectually during their college course. The course has been chosen with this in mind, and the instructors are selected with this fully in view.

We recognize the religious element as necessary to true education. Learning which is merely secular cannot secure the

highest and the best life for the individual, for society, or for the state. The Church is obliged by every consideration to do something more than merely to educate her children; she must afford education which is distinctively Christian. And the parents or guardians are under corresponding obligation to secure this element of instruction and influence for those under their care.

Semi-Centennial

The semi-centennial of the college was celebrated with appropriate exercises on October 7 and 8, 1907. Many distinguished guests were present to join with the Curators, Faculty, Alumni and students in the program of exercises which is appended:

Monday Evening.

7:30 O'clock.

Music....."Holy, Holy, Holy, Lord God Almighty."

Invocation.

Music.....Central College Alumni Quartet
Messrs. Stout, Alexander, Sears and Wagoner.

Address.....Rev. John D. Hammond, D. D.
Corresponding Secretary of Board of Education, Nashville, Tenn.

Semi-Centennial Ode.....Professor T. Berry Smith

Music.....Semi-Centennial Parade

Address.....Rev. James C. Morris, D. D., Kansas City, Mo.

Benediction.

Torch Light Procession...Central College Students and Alumni

Tuesday Morning.

10 O'clock.

Invocation.

Music.....Violin Solo

Miss Clark, of Howard-Payne College Faculty.

Address.....Hon. Tyson S. Dines, '80, Denver, Colo.

Music, Male Chorus.....Central College Students

Address.....

Bishop Charles B. Galloway, D. D., LL. D., Jackson, Miss.

Music.....Alumni Quartet

Benediction.

Tuesday Afternoon.

2 O'clock.

Methodist Preachers' Veteran Association.

Rev. W. F. Bell, Chairman.

Unveiling of McAnally Memorial Tablet.

Presentation Address.....Rev. W. S. Woodard

Responses: W. C. Scarritt, Esq., Professor T. Berry Smith, and

Rev. C. C. Woods, D. D.

3:30 O'clock.

Football Game, Johnson Athletic Field.

Central College vs. Missouri State University.

Tuesday Evening.

7:30 O'clock.

Invocation.

Music.....Alumni Quartet

Address.....Chancellor J. H. Kirkland, Ph. D., LL. D.,

Vanderbilt University, Nashville, Tenn.

Music.....Male Chorus

Inaugural Address.....William Alexander Webb

Benediction.

Semi-Centennial Banquet,
Cupples Hall.

From the incorporation of the College until 1907 the records contain the names of one hundred thirty men who have served as Curators. There have been fourteen presidents and acting presidents, and sixty-three professors and teachers (see pp. 8, 9).

Endowment

The present productive endowment of the College is securely invested and interest-bearing. It is most desirable to increase this amount at an early day to not less than \$500,000, and the Board of Curators is now organizing its efforts to complete this endowment at the earliest possible date. The large facilities of many of the older colleges are due to the timely liberality of their friends. Some generous friends of Central College have already signified their purpose of making testamentary bequests to the College. To guide any who may not know the legal style of the College, the following form has been carefully prepared:

FORM OF BEQUEST.

And I further will, devise, and bequeath unto the Curators of the Central College, located in the town of Fayette, in the county of Howard, in the State of Missouri, the sum of. Dollars, to be used and devoted by the Curators of said College for its sole use and benefit and in such manner as said Curators may in their discretion provide, to have and to hold the said sum for said purpose alone to said College forever.

Buildings

Central College has a charming campus of twenty-five acres, on which are located six of the seven buildings which accommodate the various departments of work. In order of erection the buildings are as follows:

THE ACADEMY is a substantial three-story brick structure which was built in 1855, and long served as the only building of the College. It is now devoted solely to the work of the preparatory department.

CENTENARY CHAPEL was erected and equipped in 1884, at a cost of \$28,000. The ground floor contains a spacious lecture room and some class rooms. Here the daily chapel services are held at 12 o'clock. The auditorium above has a seating capacity of 1,200. It contains a large pipe organ and on its walls are a number of marble memorial tablets.

SCIENCE HALL was erected in 1895, at a cost of about \$40,000. It has been pronounced by many to be one of the handsomest college buildings in the country. The walls are of buff brick, rising three stories above the basement, and surmounted by a stately tower. In this building is done all the college class-work. Hence it contains class rooms, laboratories, library, museum, and two spacious halls for the literary societies. It is heated by steam and is well lighted and ventilated. It occupies a site near the center of the campus.

CUPPLES HALL, erected in 1899, at a cost of about \$26,000, is a dormitory for young men. The basement is of uncut stone with high ceiling, and contains the dining room with capacity for 125, and other rooms appertaining thereto. The superstructure is of mottled red brick, three stories in height; the roof is of red tile. There are ten large rooms on each floor, besides bath rooms and other conveniences. The entire building is heated by steam and lighted by electricity. It makes a charming residence for fifty young men.

THE GYMNASIUM was completed in 1906. Its outside dimensions are 46x102 feet. The basement contains locker-rooms, shower baths, and boiler room. The walls of the building are brick, two stories in height. Within at the south end is a vestibule entry and the office. The unobstructed first floor is large enough for all drills and games. Overhead, running entirely around the walls is a suspended gallery six feet wide, affording a running track with twenty laps to the mile. This building is near the north end of the campus, adjacent to the athletic field. Cost, with equipment, about \$14,000.

WILLS HALL (1880) is a two-story frame building containing sixteen rooms for young men.

The Stephens Museum

In recognition of the valuable and timely aid given by Mr. Lon V. Stephens in developing our scientific departments, the Board of Curators resolved to name the permanent collection of biological, mineralogical and geological material the Stephens Museum.

The Museum contains a large number of specimens, embracing zoölogical, mineral, rock, fossil and other collections. They include a representative collection of Mollusks and other invertebrates, and some typical vertebrates from the well known Ward Science Establishment; choice collections of minerals from several dealers; a set of excellent German anatomical models from the National School Furnishing Company; and many fine specimens in the divisions of botany, archæology, etc. Noteworthy are some fine specimens of tracks from the sandstones of the Connecticut River valley, obtained through Bishop Hendrix; a very fine collection of marine invertebrates, obtained from the Smithsonian Institution through Senator Cockrell; and a valuable collection of rocks from the United States Geological Survey, also obtained through Senator Cockrell.

THE KILPATRICK MEMORIAL COLLECTION.—In 1904 a collection acquired partly by gift and partly by purchase from the Academy of Science of Kansas City, Mo., and for more than twelve years the property of the Scarritt Bible and Training School of Kansas City, was added to the museum. The authorities of the school have named this collection the Kilpatrick Memorial Collection, in memory of Professor J. W. Kilpatrick, who was preparing to install it in its present quarters at the time of his death. The collection contains more than eighteen hundred labeled specimens, principally minerals and fossils. Many of these are of rare beauty and of great scientific interest. There are specimens from nearly every state in the Union and from many foreign countries, and the collection covers the whole sweep of life recorded in the earth's crust, from the Cambrian to the present. In 1907 a fine life-size portrait of Professor Kilpatrick, the gift of his children, was placed above the cases containing the collection.

THE JOHNSON ARCHÆOLOGICAL COLLECTION.—Through the efforts of Rev. B. D. Sipple the College has secured a collection of about five thousand archæological specimens from Mr. C. E. Johnson, of Montgomery City, Mo. Mr. Johnson spent more than twenty years in making this collection, securing specimens from many states in the Union.

It is worthy of remark that many of our best specimens have been acquired—one, or a few at a time—through the thoughtful kindness of our friends who preserved and sent to us the good things that came in their way.

Laboratory of Biology and Geology

This Laboratory, in direct communication with the museum, is ample in size, well lighted from the north and east, and is provided with desk-room and lockers for twenty students working at a time. It is provided with the apparatus necessary for the

thorough study of plant and animal tissues, including a sliding microtome of latest design, a complete outfit for paraffin imbedding, twelve compound microscopes, micrometers, dissecting microscope, turn-table, micro-chemical re-agents, and other apparatus. A new projecting lantern and an increasing collection of lantern slides, together with a number of wall charts, add to the facilities.

The work in mineralogy is provided for with gas for blow-pipe analysis, Jolly balance, and all necessary chemical re-agents.

Laboratories and Apparatus for Chemistry and Physics

The ground floor of Science Hall is devoted to the work in chemistry and physics. The lecture room occupies a place between the two laboratories, so as to be convenient for either. Its seats for forty rise in tiers, and command a clear view of all lecture experiments.

There are two chemical laboratories with lockers and all working facilities. There is the usual complement of hoods, water supply, gas fixtures, chemicals, balances, and other appliances for both general and analytical chemistry.

The physical laboratory is large and furnished with working tables, gas connections, sinks, etc. In a glass-partitioned annex is conveniently stored an extensive supply of apparatus for illustrating every department of physics. There is also an X-ray room, with good outfit, and a dark room for photometric and photographic work.

All of these rooms are well lighted and ventilated, and arranged with a view to practical work on the part of the pupils.

Psychological Apparatus

Psychological apparatus appropriate for a complete course in experimental psychology has been recently procured. This course is offered concurrently with the latter part of the introductory course in psychology. Demonstrations are made by the instructor and experiments are worked out independently by the students. The apparatus was supplied largely from the Yale University laboratory, and the course is, in the main, that offered in Judd's *Laboratory Manual of Psychology*.

In general, apparatus is furnished for investigations along the following lines: Visual experiences, binocular and monocular; biaural recognition of direction; tonal and cutaneous sensations; tactual space perception; sensation intensities (i. e., demonstration of Weber's Law); methods for recording movements; changes in circulation accompanying consciousness; changes in muscular tension and muscular co-ordination; voluntary modifications of movements and analysis of voluntary co-ordinations; effects of practice, including impression factors, motor and perceptual habits; distraction and fatigue; memory, attention, æsthetic appreciation, and experimentation with complex mental processes.

The Library

The library occupies a large, well-lighted room on the second floor of Science Hall. About ten thousand volumes are now on the shelves, and the collection is constantly growing by donation and purchase; accessions during the current year exceed one thousand volumes.

The leading magazines and reviews are kept on file and the more important journals are regularly bound for permanent preservation. The following is the list of periodicals subscribed for:

American Historical Review	Missionary Review
American Journal of Science	Modern Language Notes
American Journal of Sociology	Modern Philology
Atlantic Monthly	Nashville Advocate
Century	Nation
Classical Quarterly	National Geographic Magazine
Classical Review	New York Advocate
Collier's Weekly	Nineteenth Century
Cosmopolitan	North American Review
Country Life in America	Outlook
Delineator	Popular Astronomy
Dial	Popular Science Monthly
Die Woche	Putnam's Weekly
Educational Review	Reader's Guide to Per. Lit.
Forum	Review of Reviews
Harper's Magazine	St. Louis Advocate
Harper's Weekly	St. Louis Republic
Hibbert Journal	Saturday Evening Post
Independent	School Science and Mathematics
Ladies' Home Journal	Scientific American
Lectures pour Tous	Scribner's Magazine
Literary Digest	Success
Living Age	World's Work
McClure's Magazine	Youth's Companion
Methodist Review	

Besides the above, a number of valuable periodicals are sent to the Library by courtesy of the publishers. Among them are the American Economist, Boston Transcript, Missouri School Journal, School, and the Western Methodist. Most of the college publications of Missouri and many from neighboring states

are made accessible through the courtesy of the exchange editor of the Central Collegian.

The Library is open from 8 to 12 and from 1:30 to 4:30. Assistants are in constant attendance, and efforts are made to give students the familiarity with modern library methods which is so important a part of the equipment of the educated man of to-day, who must not only possess information, but understand how to seek and find it for himself.

Two notable gifts have been received this year: (a) The David Rice McAnally Memorial Collection, consisting of about four hundred and fifty volumes, presented by the Ministers' Veteran Association, and (b) The private library of Professor O. H. P. Corprew, rich in the classics, literature and history.

Friends of the College who are interested in the growth of the library are invited to correspond with the librarian in regard to its needs.

Lectures and Addresses

During the past year the following course of lectures, open to the student body, and all members of the community, was given under the auspices of the College:

Opening Sermon, President H. E. Stout.

"Reconstruction Period in American History, Professor W. L. Clarke.

"Oxford, Its Life and Institutions," Professor J. J. Tigert.

"The Relation of the Classics to the Holy Scriptures," Professor D. R. Lee.

"The Planet Mars," Professor W. J. Osburn.

Student Organizations

LITERARY SOCIETIES.—Connected with the College are two literary societies for young men, the Aristotelian and the Phi Alpha. These societies render efficient service in the intellectual and moral culture of their members. So excellent an adjunct are they to the literary work of the College that the Faculty would urge every pupil entering the College to become a member of one or the other of them.

The society halls have been recently refurnished, and are very attractive places for assembly and work.

YOUNG MEN'S CHRISTIAN ASSOCIATION.—The Young Men's Christian Association is well organized in every branch of work. Students of both the College and Academy are eligible to membership. One of the parlors at Cupples Hall has been neatly furnished as a reading room and general headquarters for the Association. In this room daily morning prayer meetings are held; the regular weekly devotional meetings are held each Sunday afternoon at Centenary Chapel. Four Bible-study classes and several mission-study classes are offered by the Association. Special effort is made to bring all students under these wholesome influences. A feature of the work of the Association that has been of great benefit to a number of young men during the past year, has been the Employment Bureau, which helps those young men who desire it to get work. A member of the Reception Committee will meet all students at the station in the fall. Write for any other information to the President, O. D. Means, Fayette, Mo.

OFFICERS FOR 1908-09.

O. D. MEANS, *President*.

H. E. RICH, *Vice President*.

E. R. LIVESAY, *Recording Secretary*.

S. M. DAVIS, *Corresponding Secretary*.

H. R. COMBS, *Treasurer*.

Alumni Society

On the twenty-seventh day of June, 1873, a number of the alumni of Central College organized the Alumni Society of the College. The Society is now composed of about two hundred members, nearly all of whom are prominent in their spheres of life. Under the by-laws of the Society, ante-bellum students, titled graduates, and graduates in three or more schools are eligible to membership. During recent years the Society is becoming more and more a source of strength to the College. At the meeting of 1903 a resolution was adopted, urging local organizations for the purpose of strengthening College ties and assisting in promoting the interests of Alma Mater. The Society already has a liberal representation upon the Board of Curators. The object of the Society is fully expressed by its preamble, which is as follows:

PREAMBLE.

“We, the Alumni of Central College, for the purpose of perpetuating the memories of our College associations, for advancing the interests of our Alma Mater, and for preserving that mutual fellowship and union which characterized us in our labors in College, do hereby organize ourselves into a Society, the object of which shall be the good of its members and the honor of our College.”

ALUMNI OFFICERS FOR 1906-07.

B. D. SIPPLE, Fayette, *President*.

A. P. WARREN, Lexington, *First Vice President*.

A. T. DUMM, Jefferson City, *Second Vice President*.

W. J. OSBURN, Fayette, *Secretary and Treasurer*.

The regular meeting for the election of officers and nomination of Curators is held during commencement week. All members should endeavor to attend.

A committee of the Alumni Society has in charge the preparation of an illustrated History of Central College, to be pub-

lished in the near future. It is earnestly desired that all alumni and old students heartily co-operate in this undertaking. Send sketches, pictures, etc., to W. J. Osburn, Fayette, Mo.

Athletics

As the proper development of a young man's physical being is recognized as a very desirable part of his college training, it is the policy of Central College to encourage clean athletics in all its phases. *To become a member of any team in athletics a student under twenty-one years of age must have the written permission of his parents or guardian, and must be doing work satisfactory to the Faculty.*

The athletic sports of the College are supported largely by the Athletic Association, which is composed of the entire Faculty and student body. The membership fee is \$1.50 per semester, and entitles the members to free admission by season ticket to all the athletic contests and exhibitions of the College. The president, vice-president and secretary of the Association and the managers of athletic teams are elected from the student body. For the direction of the athletic interests of the College there is an athletic committee, consisting of two members of the Faculty, chosen by the Faculty, two alumni elected by the Athletic Association, and the three officers of the Association. This committee supervises all schedules of games and audits the accounts of the managers of the several athletic teams. The treasurer of the Association is a member of the athletic committee, elected by the committee.

The Johnson Field, donated by Mrs. Catherine Johnson, joins the campus on the north. It is well fitted for all kinds of athletic sports.

The Tennis Club has a large membership. The courts are situated at the east end of Science Hall.

Throughout the school year the gymnasium is open to all the students, who will there have systematic instruction in physical

culture under a capable director. This work is required of all students except such as may be excused by the Faculty.

Government

The government of the College is conducted by the President and Faculty, under the authority and supervision of the Curators.

It is thought more conducive to good order and more helpful to the student that there should be a few simple rules for the regulation of conduct, rather than an elaborate code of requirements. In the year 1868 these words were entered in the Matriculation Record of the College:

"I enter this institution with a sincere purpose to fulfill the duties of a good student, and to conduct myself at all times according to the rules of propriety accredited in good society."

Every student since that time has signed his name to this declaration. The one demand made is that each student shall conduct himself as a gentleman, and he is thrown upon his own resources to interpret this rule and to observe it.

Students are sent to college to be fitted for honorable and useful stations in life. This object will be steadily kept in view by the Faculty, and their concern will be more for character than for the number of students. For the attainment of this object there must be a wholesome moral and religious sentiment pervading the body of the students; therefore, when any student by continued neglect of duty ceases to receive benefit from his connection with the College, and, by his example and influence, becomes injurious to others, he will not be allowed to remain longer in the institution, but his parent or guardian will be requested to remove him.

Reports are mailed to parents and guardians at the middle and close of each semester; special reports, however, will be sent whenever, in the judgment of the Faculty, a student is derelict in the performance of his duties.

Fees and Expenses

The collegiate year is divided into two semesters, and, with the exception of the fee for diploma, the following charges are for each semester:

Graduate students	\$20.00
Tuition in College	25.00
Tuition in Academy	20.00
Incidental fee	6.00
Athletic Association fee	1.50
Fee for diploma	5.00
Laboratory fees:	
Advanced Chemistry.	4.00
Mineralogy	4.00
Other college classes, each.....	2.00
Academy classes	1.00

The incidental fee is required of every pupil, and must be paid at enrollment. No student will be allowed to recite until settlement has been made with the Registrar and an entrance card secured.

No deduction will be made in College fees except for tuition in case of absence caused by protracted illness.

New students entering after the first month are charged from the date of entrance; others from the opening of the semester, if they advance with their former classes.

ESTIMATE OF COST FOR YEAR IN COLLEGE.

	Low.	Liberal.
Tuition and fees	\$ 65.00	\$ 73.00
Boarding	120.00	160.00
Books, Stationery, etc	15.00	25.00
Laundry.	10.00	15.00
Total.	\$210.00	\$255.00

Dormitories

Cupples Hall is a modern building, having twenty-five large, well-lighted rooms. It is heated by steam and lighted by electricity, and has a bath room on each floor. Each room is furnished with everything except bedding and toilet supplies. The rooms are intended for two students each, who furnish bedding and toilet articles and pay for laundering bed clothes and towels.

The College furnishes no board to students. The hall is in charge of a manager, appointed by the College authorities, and students provide for themselves as a boarding club, using the kitchen and dining room of the hall.

The charge for the rooms is as follows: Where two persons occupy a room, fifteen dollars each per semester; when three occupy the same room, ten dollars each per semester. These charges must be paid in advance.

There is a smaller dormitory, Wills Hall, in which the charge for rooms is ten dollars per semester. Two students may occupy one room and divide this charge between them.

On entering either of the dormitories, the student is expected to deposit a damage fee of two dollars, against which charges will be made for unrepaired damages to rooms or furniture used by him. The unused balance will be returned when the room is vacated.

Students desiring to reserve rooms should write to the manager, Mr. A. L. Meyer, Fayette, Mo. A student wishing to reserve a room must deposit three dollars with the manager, to be forfeited in case of failure to take the room.

SCHOLARSHIPS, PRIZES, AND LOAN FUNDS

High School Scholarships

The Board of Curators has authorized the College to offer a scholarship valued at \$50 to each of the several high schools in the state whose graduates are prepared to enter the Freshman class of Central College. The award will be made on the basis of scholarship and character, and a certificate admitting the holder to the benefit of the award for the ensuing year will be granted to the best male student in the graduating class, provided his rank in scholarship does not fall below the general average of the whole class.

It is hoped that these certificates may be issued on the day of graduation, but where this is not done applicants may send testimonials of good moral character and a statement of grades and rank in scholarship for the current year certified by the superintendent or principal of the high school to the Registrar of Central College.

Academy Scholarships

A scholarship valued at \$50 is offered by the Board of Curators to each of the three Central Academies located respectively at Fayette, Palmyra, and Richmond, and will be awarded on the recommendation of the principal to the young man entering college who made the highest record in deportment and scholarship during his last year in the Academy.

District Scholarships

A scholarship valued at \$50 is offered by the Board of Curators to each of the presiding elder's districts in the three patronizing conferences in Missouri. The appointment is left to the presiding elder of the district. It is very desirable that

the appointee should be prepared to enter the Freshman class of Central College.

The names of holders of scholarships and of applicants therefor must be in the hands of the Registrar of Central College by September 1st. Requirements for admission to the Freshman class of Central College will be found on pages 35-38.

Joseph C. Hendrix Scholarships

By bequest of Hon. Joseph C. Hendrix, of Brooklyn, New York, a former student of Central College, who died in November, 1904, there were established two scholarships of the value of one hundred and twenty-five dollars each annually to be awarded to the students of Central College and Academy who in the judgment of the Faculty are most worthy at the close of each year's work. These scholarships are designed to stimulate students of limited means to secure a complete collegiate course.

The conditions of award are as follows:

I. The scholarships will be available for undergraduates only, and, when other things are equal, preference will be given to the more advanced student.

II. Students desiring to avail themselves of these scholarships must make written application on prescribed form, which may be obtained from the Registrar. These applications should be in the hands of the Faculty by May 1st of the current year.

III. The awards will be made at the close of the scholastic year and will be based upon the entire scholastic career of the applicant, including scholarship, deportment, promise of future usefulness, and general bearing in every walk of life.

IV. The money pertaining to these scholarships shall be held in trust for the benefit of the holders thereof and shall be paid to them upon the approval of the President in four equal sums, viz., at the beginning and middle of each semester, during the scholastic year for which they are available.

V. First and second alternates shall be named, one or both of whom shall enjoy all the benefits of the scholarships in case one or both of the principals shall fail to attend during the scholastic year following the award.

VI. In exceptionally worthy cases a scholarship may be awarded to the same student a second time.

These scholarships were awarded for the first time in 1907, to Eugene Reginald Livesay, and Sherman Allen Reeves.

Prizes and Contests for Undergraduates

No student who is neglectful of any college duties will be considered eligible to contend for any prize, or to represent the College in the public exercises of the literary societies. The whole number of recitations per week must be at least thirteen, not more than three of which may be graduate studies. Contestants must have completed all the studies of the Academy. This, however, does not apply to the prize for Declamation.*

I. The *William A. Smith Prize* of twenty dollars, endowed by Bishop E. R. Hendrix, is awarded for excellence in oratory. The contestants for this prize are selected by the two literary societies of the College from the three highest classes, and the contest is held during commencement week. The orations must not exceed 1,500 words, and must be submitted to the Faculty at least three weeks before commencement.

This prize has been awarded as follows:

1875—C. B. Rush	1891—A. F. Smith
1876—R. J. Coleman	1892—J. T. Gose
1877—W. D. Vandiver	1893—F. L. Bronaugh
1878—T. S. Dines	1894—T. L. Anderson
1879—R. E. Ball	1895—W. M. Courts
1880—E. B. Clark	1896—W. H. Bronaugh
1881—W. C. Scarritt	1897—R. L. Wilkinson
1882—T. H. Harvey	1898—H. J. Potter
1883—W. M. Hough	1899—C. M. Hay
1884—W. W. Wood	1900—E. H. Selecman
1885—D. L. Roe	1901—B. P. Taylor
1886—A. P. Warren	1902—R. I. Tolson
1887—L. R. Wilfley	1903—C. W. Wagoner
1888—J. N. Jackson	1904—J. L. Davis
1889—P. W. Yancey	1906—S. M. Williams
1890—S. P. Cresap	1907—J. N. Broadhead

*For prizes offered to Academy students, see page 62.

II. The *Dockery Prize* of twenty dollars, endowed by Governor A. M. Dockery, is awarded at the end of the year for the best general scholarship.

This prize has been awarded as follows:

1878—E. E. Penn	1893—F. A. Briggs
1879—R. E. Ball	1894—J. T. Gose
1880—T. H. Harvey	1895—O. C. Lester
1881—A. P. Warren	1896—C. M. Barr
1882—E. B. Craighead	1897—E. M. Violette
1883—B. P. Searey	1898—C. B. Duncan
1884—H. C. Penn	1899—C. M. Hay
1885—A. C. Miller	1900—F. C. Bowles
1886—R. T. Kerlin	1901—Miss Helen McCoy
1887—W. W. Wood	1902—D. L. Mumpower
1888—J. N. Jackson	1903—W. J. Osburn
1889—G. H. Burr	1904—Ethel Rush
1890—W. M. Ledbetter	1905—F. C. Heck
1891—A. F. Hendrix	1906—R. H. Kirk
1892—Charles Franklin	1907—R. R. Walton

III. The *Disclaimer's Prize* of twenty dollars, given by the two literary societies of the College, is contested for on the second Monday in April. Each Society may elect three representatives to compete for this prize.

In 1907, this prize was awarded to Grant Johnson.

IV. The *Adam Hendrix Prize* of twenty dollars, endowed by Mrs. Adam Hendrix, will be awarded at the end of the year for the best original composition of not more than 1,500 words.

This prize has been awarded as follows:

1877—C. R. Foster	1890—J. A. Parks
1878—R. E. Ball	1891—J. H. Owings
1879—T. S. Dines	1892—Mary Hendrix
1880—S. W. Roberts	1893—L. C. Knowlton
1881—E. Ward	1894—J. T. Gose
1882—T. H. Harvey	1895—T. S. Nishakawa
1883—E. B. Craighead	1896—T. N. Anderson
1884—W. H. Key	1897—O. C. Lester
1885—H. C. Penn	1898—E. B. Crooks
1886—P. S. Rader	1899—C. S. Lewis
1887—P. W. Horn	1900—T. M. Reynolds
1888—A. W. Walker	1905—Lilburn Kingsbury
1889—G. H. Burr	1907—J. M. Monroe

V. The *Central Collegian Prize* of twenty dollars is given by the two literary societies of the College and is subject to their own regulations. It is awarded for the best article published during the year in the *Central Collegian*.

In 1907, this prize was awarded to Claude W. Blakey.

Arthur Davis Loan Fund

In memory of his first-born son, who died in November, 1882, Mr. Arthur F. Davis, a former student and for more than twenty-five years a Curator and treasurer of Central College, whose untimely death on January 4, 1907, deprived the College of one of its truest friends, gave \$5,000 to endow the "Arthur Davis Loan Fund." The income of this fund will be loaned to such students as shall be approved by the Faculty, to enable them to complete their education. Preference will be given to those students who have been longest in College, and whose habits of application are best known. In establishing this fund the generous founder wrote:

"During my connection with Central College as a student and Curator, I have known young men of a high order of talent compelled to leave college for want of means to sustain themselves, and I recognize the necessity of some provision to assist them in prosecuting their studies."

Ministerial Aid Society of the Missouri Annual Conference

Since 1876 the Ministerial Aid Society of the Missouri Annual Conference has rendered valuable service to the cause of ministerial education by establishing and maintaining a loan fund for ministerial students. At present the fund amounts to \$3,500, and if all claims were promptly met, the board would have about \$700 at its disposal each year. More than one hundred ministers have been aided by this fund and untold good has been accomplished.

Rev. B. D. Sipple, Fayette, Mo., is corresponding secretary of the board of managers.

Self Help

A number of young men of high purpose, but limited means, are enabled to pay for all or a portion of their board and lodging by waiting on the tables in Cupples Hall, by caring for furnaces, or by otherwise helping about the homes in the community. The Employment Bureau of the Young Men's Christian Association renders valuable service in assisting young men to find work of this nature.

While all worthy efforts of young men to work their way through College receive the hearty recognition of both students and Faculty, it is well to bear in mind that only those in good health and of more than average mental ability can hope to secure satisfactory results when they are compelled to give a considerable portion of their time to outside work.

REQUIREMENTS FOR ADMISSION

It is very important for all students to be present at the opening of the semester, in order that the work of matriculation, registration, and examination may be completed promptly.

Satisfactory evidence of good moral character is required of all applicants for admission. It is understood that when a student matriculates, he thereby pledges himself to observe all the rules of the College.

No one will be allowed to recite until settlement has been made with the Registrar and an entrance card secured.

Young men and young women are admitted upon the same conditions, are subject in every respect to the same regulations, and are equally eligible to the degrees conferred by the College.

Candidates for admission to the College must pass satisfactory examinations, or produce acceptable certificates of proficiency, in the following subjects: English, two Foreign Languages, Mathematics, History, and Science, amounting in all to fourteen units. A "unit" denotes an amount of work in one subject equal to daily recitations during one school year.

English, 3 Units

The scope of the work required for admission in English is indicated by the books given below, which are recommended by the leading associations of preparatory schools and colleges:

READING: The candidate will be required to present evidence of a general knowledge of the subject-matter, and to answer simple questions on the lives of the authors. In case of examination, the student will be expected to write a paragraph or two on each of several topics, to be chosen by the candidate from a considerable number—perhaps ten or fifteen—set before him in the examination paper. The treatment of these topics is designed to test the candidate's power of clear and accurate

expression, and will call for only a general knowledge of the books. In place of a part or the whole of this test, the candidate may be allowed to present an exercise book, properly certified by his instructor, containing compositions or other written work done in connection with the reading of the books. The books set for this part of the examination will be:

1907 and 1908.—Shakespeare's *Macbeth* and *Merchant of Venice*; the "Sir Roger de Coverley Papers" in *The Spectator*; Irving's *Life of Goldsmith*; Coleridge's *Ancient Mariner*; Scott's *Ivanhoe* and *Lady of the Lake*; Tennyson's *Gareth and Lynette*, *Lancelot and Elaine*, and *Passing of Arthur*; Lowell's *Vision of Sir Launfal*; George Eliot's *Silas Marner*.

STUDY AND PRACTICE: This part of the examination presupposes the thorough study of each of the works named below. The examination will be upon subject-matter, form, and structure, and will also test the candidate's ability to express his knowledge with clearness and accuracy. The following will be the books required for examination:

1907 and 1908.—Shakespeare's *Julius Caesar*; Milton's *L'Allegro*, *Il Penseroso*, *Comus*, and *Lycidas*; Burke's *Speech on Conciliation with America*; Macaulay's *Essay on Addison* and *Life of Johnson*.

Foreign Language, 4 Units

Three units of Latin are required of all students. The remaining unit may be either Greek, for entrance upon the course leading to the degree of A. B., or German, for entrance upon the course leading to the degree of B. S. The following statement shows the work which must have been done in these subjects:

LATIN: The work for admission covers four books of Cæsar's *Commentaries*, four orations of Cicero, and six books of Vergil's *Æneid*. An equivalent amount from Ovid is accepted in lieu of two books of Vergil's *Æneid*. One year of

Latin prose composition in a standard book on this subject is also required. The student should also have mastered some textbook on mythology, such as that of Gayley or Bulfinch.

Beginning with the school year 1910-11, six orations of Cicero will be required instead of four.

GREEK: White's *Beginner's Greek Book* or an equivalent, thoroughly mastered, is required.

GERMAN: The requirement in German comprises: (a) A thorough knowledge of the rudiments of grammar; (b) the reading of about 150 pages of easy prose; (c) careful drill in pronunciation; writing German from dictation.

Mathematics, 3 Units

ALGEBRA: The requirement in algebra implies a ready knowledge of factoring, involution, evolution, radicals, fractional and negative exponents, radical equations, and simultaneous quadratic equations as treated in Bowser's *College Algebra*.

GEOMETRY: Plane geometry, with special emphasis on original work such as the exercises found in Wentworth's *Geometry*.

Beginning with the year 1909-10, solid geometry, and algebra through ratio, proportion, variations, and progressions will be required for admission.

History, 1 Unit

In addition to the work in United States History given in the common school course, the student must offer a full year in one of the following fields: Ancient history to 800 A. D., Medieval and Modern history, English history, United States history.

A year's work in general history will not be accepted as the equivalent of a year's work in one of the above fields.

Science, 1 Unit

An elementary course in biology or physics, taught by laboratory methods.

Elective Subjects, 2 Units

For the remaining units, the candidate for admission may offer any approved secondary school subjects which he has pursued for a period of not less than one school year each of daily recitations.

Admission by Certificate

The certified grades (not diplomas) of the Central Academies at Fayette, Palmyra and Richmond, and of approved high schools, are accepted instead of examinations on the subjects offered for admission. No certificate from a preparatory school will be accepted, in lieu of examination, as covering any part of the work of the College course.

Admission by Examination—Deficiencies

Candidates for admission who are unable to present acceptable certificates covering entrance requirements may gain entrance credit by satisfactorily passing an examination on each subject not so covered. Students whose preparation is not sufficient to admit them to the College will be assigned to academy classes in the subjects in which they are deficient; and no student will be permitted to neglect such deficiencies in order to take courses in the College. Students may, however, be admitted to the Freshman class as conditioned students, provided that their deficiencies do not exceed two units.

Admission to Advanced Standing

Students who have attended other colleges of approved standing, such as those in the Missouri College Union, will be admitted to advanced standing without examination, upon presentation of a properly certified statement of work done, accompanied by a letter of honorable dismissal. No degree will be conferred upon any student who has not been in residence at Central College at least one year.

Special Students

It is very desirable that all students continue their studies to graduation. Even when a student does not expect to graduate, it will usually be wise to pursue one of the regular courses while in college, and irregular selection of studies will not be permitted without good reason. Persons of mature years who give evidence of well-defined purpose and who desire to pursue some special line or lines of work without becoming candidates for a degree may be admitted as special students. This will be done only upon written application, and for reasons satisfactory to the Faculty. Such students are subject to the same regulations as other students, with regard to the quality of work done and attendance upon College exercises.

REQUIREMENTS FOR DEGREES

Required and Elective Work

The courses offered by the College are designed to give the student a liberal education equal in grade to the undergraduate work of the best institutions in the country. Such a course is the best possible for the student whose work ceases with the college, as well as for the student who is preparing for graduate study along special lines in a university. Individual aptitudes and purposes are recognized by liberal provision for elections. The studies of the first two years are closely prescribed, and include those essential to liberal culture as well as those which form the basis of advanced work. The studies of the Junior and Senior years are largely elective.

Amount of Work

The unit of reckoning in the College is the "credit hour," which denotes one recitation per week for one semester. Thus a "three-hour" course recites three times per week, and entitles the student to a credit of three hours for each semester through which the course runs.

Every student is required to take at least thirteen hours of recitation work or lectures per week, unless a smaller assignment is granted by the Committee on Instruction. Two hours of laboratory work are reckoned as the equivalent of one hour of recitation or lecture work.

Not more than sixteen hours may be taken except by permission of the Committee.

The Bachelor's Degree

The College confers two baccalaureate degrees, *Bachelor of Arts* and *Bachelor of Science*. To receive a degree, the candidate must have satisfactorily completed the required and elective studies of one of the four-year courses outlined below. If the candidate has been granted advanced standing in this institution after attending elsewhere, a minimum residence period of one year will be required before any degree will be granted.

The Master's Degree

The degrees of *Master of Arts* and *Master of Science*, respectively, are conferred upon students who hold the corresponding baccalaureate degrees from Central College or from some other college of equal rank, and have pursued in residence a course of advanced study, approved by the Faculty, for a period of not less than one year. The studies selected must be chosen from at least three departments of college instruction and must be equivalent to four courses of three hours each per week. With the approval of the professor of the department, undergraduate courses may be selected, provided they shall not be lower than the third or Junior year, and provided, furthermore, that additional work shall be required of the candidate at the discretion of the instructor. Evidence of the candidate's proficiency in the approved studies is given by examinations, which must not fall below a grade of 80, and by the preparation of a thesis under the direction of one of the professors in whose department the candidate is pursuing advanced work.

GROUPS OF STUDIES LEADING TO THE DEGREES OF BACHELOR OF ARTS AND BACHELOR OF SCIENCE

CLASSICAL COURSE.

Freshman Year

<i>First Semester</i>	<i>Second Semester</i>

DEPARTMENTS OF INSTRUCTION

Philosophy

PROFESSOR TIGERT.

COURSE I. Logic. This course is intended to give those who expect to pursue other courses in Philosophy a thorough acquaintance with the principles of deductive thinking. The study of concepts, judgments, and inferences is taken up in order, and no attempt is made to consider any problems of Philosophy other than those relating to Logic and its applications. Considerable attention is given to the practical application of the subject. Fallacies are carefully investigated and Praxis is emphasized throughout the course. Three hours per week, first semester. Open to students who have completed Course II in English.

COURSE II. Psychology. In connection with Judd's *Introduction to Psychology*, this course begins with a thorough study of the nervous system and the organs of sense. It turns then to sensations and their relations, and finally to still higher forms of mental functions, experience and expression, instinct and habit, memory and ideas, language, imagination, etc. Throughout the course experimental demonstrations are given by the instructor and, concurrently with the latter part of the course, independent experimental investigations are made by students. An attempt is made to show the bearing of psychological questions on philosophical problems of Metaphysics and Epistemology (Idealism, Realism, mind and body, etc.); the whole course terminates with the applications of Psychology and its value for kindred sciences, Ethics, Logic, Æsthetics, etc. It thus serves not only as a study of consciousness, but also as a general preparation for the further study of Philosophy. Three hours per week, second semester. Open to students who have completed Course II in English.

COURSE III. Philosophy. In this course is offered a comprehensive survey of the history of Philosophy from the time of the Ionian school to the present. The ancient and modern periods are emphasized, little time being devoted to the mediæval period and scholasticism. Some attempt is made to investigate the sources and brief papers are written from time to time. The purpose of the whole course is to lay a good foundation for the comprehension of the perplexing problems of Metaphysics, Epistemology, and Ethics. Three hours per week, first semester. Required of all Seniors.

COURSE IV. Ethics. This is a study of the first principles of moral science with a view to giving the student some clear conception of the fundamental ideas of ethical science. It is, however, not only an investigation of moral theory, but is also a treatment of its practical application. The principles of ethical theory are applied to our daily conduct and the various virtues and duties are defined and discussed. Three hours per week, second semester. Required of all Seniors.

COURSE V. Philosophy. This course includes one semester in an investigation of metaphysical problems and one semester in epistemological reflections. Lectures are given in connection with Paulsen's *Introduction to Philosophy* as a text-book. In the Metaphysics, both ontological and cosmological questions are treated, and in the Epistemology, Realism, Phenomenalism, Empiricism, and Rationalism are taken up in order with a view of forming a clear and consistent theory of thought and knowledge. Students are required to read extracts from the sources in conjunction with the lecture course. Three hours per week, throughout the year. Open to all who have completed Courses I and II or Courses III and IV.

The Bible

PRESIDENT WEBB.

PROFESSOR HOCKETT.

PROFESSOR TIGERT.

This department is organized in order to effect the purpose of the College, viz.: "To afford to young men and women under the direction of the Church an education distinctively Christian." The Bible is a part of the College curriculum, not taught from the standpoint of theological dogma, but rather from that of Christian history and morals and evangelical principles.

COURSE I. Old Testament History. One hour per week, throughout the year. Required of all Freshmen. PROFESSOR HOCKETT.

COURSE II. The Bible as Literature. One hour per week, throughout the year. Required of all Sophomores. PRESIDENT WEBB.

COURSE III. (a) The Life of Jesus. One hour per week, first semester. (b) Evidences of Christianity. One hour per week, second semester. Required of all Juniors. PROFESSOR TIGERT.

Ancient Languages

PROFESSOR LEE.

All courses in this department recite three hours per week throughout the year. Students must have for class work texts prescribed by the instructor.

Latin

COURSE I. The Freshman year will be given to a study of Cicero's essays, *De Senectute* and *De Amicitia*, selections from the History of Livy covering Books I-XLV, and selections from Aulus Gellius. The work in Aulus Gellius will be rapid, and students must be prepared to cover much ground in the time allowed. The work in Cicero and Livy will also include carefully prepared papers on topics properly arising in a study of these authors. Considerable time will be given to the writing of Latin. Required of Freshmen in the A. B. course; elective with French for students in the B. S. course.

COURSE II. The work of the Sophomore class will be on Horace. The *Odes* and *Epodes*, *Satires* and *Epistles* will be studied. The metrical reading of this author will be made a prominent part of the work. A large amount of supplementary reading will be required and evidence of this must be given by the preparation of papers on assigned topics.

Selections will be read from Roman Law during part of the second semester, and this will be supplemented by a close study of Johnston's *Private Life of the Romans*. Required of Sophomores in the A. B. course; elective with French in the B. S. course.

COURSE III. In the Junior year students are offered a course in Plautus. The work is based on the *Captivi* and the *Trinummus*, but a close acquaintance with several other plays will be expected. The influence of Plautus on other literature will be studied. The poems of Catullus will be read, and in connection with these, papers will be prepared on subjects covering the range of Latin literature, which will be studied both by text-book and by the actual rapid reviewing of entire works in Latin and in English of the great Latin writers. None but strong students are advised to take this course. Elective for Juniors and Seniors who have had Courses I and II.

Greek

COURSE I. The Freshman work in Greek presupposes a very thorough knowledge of White's *Beginner's Greek Book* or an equivalent, and will cover Xenophon's *Anabasis*, Books I-V in the first semester. Homer's *Odyssey*, selections from Books I-XII will be the work for the second semester. There will be much work on grammar and the writing of Greek. Papers will be prepared by each student from books in the departmental and general library of the college. The metrical reading of the *Odyssey* will be given attention. Required of Freshmen in the A. B. course.

COURSE II. The Sophomore class during the past year read selections from the *Orations* of Lysias, selections from the *Satires* of Lucian, and selections from the *Septuagint*. Students are required to prepare careful papers on the subjects arising from the studies in this course. Greek writing is given a very important place. Required of Sophomores in the A. B. course.

COURSE III. The Junior class work is elective for Juniors and Seniors who have completed Courses I and II but should not be undertaken by any but those able and having time to do heavy work. During the past year the class worked on Sophocles and Euripides. After reading plays by these authors, the effect of Sophocles and Euripides on later writers, Latin, French, German, and English, was studied, and comparisons were made between the various later writers and the Greek models. This course also deals with Greek literature as a whole, and students are not only required to become masters of the outlines of Greek literature, but to form an actual acquaintance with the important Greek writers either in the original or in English translations or by both methods.

Modern Languages

PROFESSOR BASKETT.

German

COURSE I. Elementary. Vos, *Essentials of German*; oral exercises; dictation. Three hours per week, first semester.

COURSE II. Continuation of I. Easy Stories; Thomas, *German Grammar*; oral exercises; dictation. Three hours per week, second semester.

COURSE III. Heyse, *L'Arrabbiata*; Ebner-Eschenbach, *Die Freiherren von Gemperlein*; Guerber, *Myths of Northern Lands*; Grammar (Part II); prose composition. Three hours per week, first semester.

COURSE IV. Schiller, *Wilhelm Tell* and *Wallensteins Tod*; Grammar (Part II); prose composition. Three hours per week, second semester.

COURSES I, II, III, IV are required of students in the B. S. course.

COURSE V. Studies in German Literature. Lessing's *Nathan der Weise* and *Minna von Barnhelm*. Three hours per week, first semester.

COURSE VI. Goethe's *Faust* (Part I) and *Iphigenie auf Tauris*. Life of Goethe. Three hours per week, second semester.

French

COURSE I. Elementary. Fraser and Squair, *French Grammar*; drill in pronunciation; dictation; oral exercises; Aldrich and Foster, *French Reader*. Three hours per week, first semester.

COURSE II. Continuation of I. Grammar, reader, pronunciation, dictation, oral exercises. Three hours per week, second semester.

COURSE III. Mérimée, *Colomba*; Fraser and Squair, *French Grammar* (Part II); prose composition; syntax. Three hours per week, first semester.

COURSE IV. Hugo, *La Chute*; La Brète, *Mon Oncle et mon Curé*; prose composition; syntax. Three hours per week, second semester.

COURSE V. Studies in French Literature: four dramas of Corneille and Racine. Three hours per week, first semester.

COURSE VI. Studies in French Literature; four dramas of Molière. Three hours per week, second semester.

English

PROFESSOR WEBB.

The courses of study offered in the English Department embrace the theory and practice of composition and the study of literature.

Work in composition is commenced in the Freshman class, and is required in connection with all courses in English. In the study of literature special attention is directed to the sympathetic and vital interpretation of the masterpieces of English literature. Careful study is made of the author's thoughts, of his method of expression, and of his relation to the literary movements of his time. The several courses taken together afford an opportunity of getting a comprehensive view of the origin and development of the English language and literature.

COURSE I. Literature and Composition. Select poems of Tennyson, Wordsworth, Milton, and Shakespeare; Palgrave's *Golden Treasury*; readings in English prose. Written exercises weekly; frequent conferences with the instructor. Three hours per week, throughout the year. Required of all Freshmen.

COURSE II. Advanced Rhetoric and Composition. Lectures, text-book, prose selections; special attention given to the English essayists. Three hours per week, throughout the year. Required of all Sophomores.

COURSE III. Shakespeare. A careful and critical interpretation of several representative plays of Shakespeare, with

rapid reading and discussion of many others. Three hours per week, throughout the year. Open to students who have completed courses I and II.

COURSE IV. Milton. *Paradise Lost* and selections from his prose works. Three hours per week, first semester.

COURSE V. American Literature. Lectures, required readings, discussions, and essays. Three hours per week, second semester.

Courses IV and V are elective for Juniors and Seniors. They may be omitted at the discretion of the instructor.

COURSE VI. Nineteenth Century Literature. A study of the leading writers and movements of the century. Selections from Coleridge, Wordsworth, Shelley, Keats, Byron, Tennyson, and Browning are studied and discussed in class. Collateral reading from the leading prose writers will be assigned. Three hours per week, throughout the year. Intended primarily for Seniors and pre-supposes the completion of courses I, II and III.

COURSE VII. Historical English. The development of the English language and literature in the Anglo-Saxon and the Middle English periods. The first semester is devoted to the study of Anglo-Saxon, the second to the works of Chaucer. Three hours per week, throughout the year. Elective for Seniors and graduate students.

Graduate Instruction

Special provision for graduate instruction is made to meet the wants of individual students.

History and Economics

PROFESSOR HOCKETT.

COURSE I. History of Western Europe from the Barbarian invasions to the Protestant Revolution. The work is based on Robinson's *History of Western Europe*, *Readings in European History* (abridged edition), and Trenholme's *Syllabus*. Collateral reading is required on each lesson. Three hours per week, first semester. Required of all Freshmen.

COURSE II. History of Western Europe since the Protestant Revolution. A continuation of Course I. Three hours per week, second semester. Required of all Freshmen.

COURSE III. History of England to the Accession of the Stuarts. A general course, with emphasis on economic and constitutional history. Cheyney's *Short History of England* is used as an outline, but the main part of the work consists of lectures and extensive collateral readings. Three hours per week, first semester. Elective for students who have passed in Courses I and II.

COURSE IV. History of England since the Accession of the Stuarts. A continuation of Course III. Three hours per week, second semester. Elective on same conditions as Course III.

COURSE V. History of Greece. Three hours per week, first semester. Elective for students who have passed in Courses I and II. (Not given in 1908-09.)

COURSE VI. History of Rome. Three hours per week, second semester. Elective for students who have passed in Courses I and II. (Not given in 1908-09.)

COURSE VII. History of the United States from 1783 to 1829. This course is given by means of lectures, in connection with which students are required to read extensively and write topics upon assigned subjects. Three hours per week, first

semester. Intended for Juniors and Seniors. Should be preceded by Courses III and IV.

COURSE VIII. History of the United States since 1829. A continuation of Course VII. Three hours per week, second semester.

COURSE IX. This Course will deal with some period of European or American history in a way suited to the needs of advanced students. The field chosen will vary from year to year. Two hours per week, throughout the year. Intended for Seniors and Graduates.

COURSE X. Economics. A full year is given to the study of economics. An introductory survey of economic theory, based on Fetter's *Principles of Economics*, supplemented by lectures, collateral readings, and class reports, occupies about two-thirds of the year. The remainder of the year is devoted to the intensive study of some of the more important economic problems. Three hours per week, throughout the year. Intended for Seniors.

Mathematics

PROFESSOR BOND.

The main purpose in the study of mathematics should be to develop and strengthen the reasoning powers rather than the memory. There are many other studies that furnish ample opportunity for memory work. Therefore, in all the mathematical courses here offered, and in the method of teaching, this main purpose will be kept steadily in view, and as little mere memorizing of rules, propositions, and formulæ required as may be deemed necessary for the accomplishment of this purpose.

COURSE I. Advanced Algebra, Plane Trigonometry, and Solid Geometry.

The work in algebra will include ratio, proportion, variation, the three progressions, undetermined coefficients, the general binomial theorem and its applications, the theory and computation of logarithms. Bowser's *College Algebra* is the text.

The work in plane trigonometry will involve the derivation of formulæ and their application to the solution of problems. The scope of the work is shown in Chauvenet's *Trigonometry*.

In solid geometry the class will study the properties of planes, diedral and polyhedral angles, prisms, pyramids, regular solids, cylinders, cones, spheres, and spherical angles and triangles. Text-book, Wentworth's *Geometry*.

Three hours per week, throughout the year. This course is required of all Freshmen.

COURSE II. (a) Plane Surveying and Leveling; (b) Determinants; (c) Theory of Equations. Any one of these may be taken as a two-hour course in the second semester. Elective for students who have had Course I.

COURSE III. Spherical Trigonometry and Analytics. The nature and scope of the work are shown in Chauvenet's *Trigonometry* and Nichol's *Analytics*, which are the texts used. Three hours per week, throughout the year. This course is required of Sophomores in the B. S. course. Elective for others who have had Course I.

COURSE IV. Differential and Integral Calculus, as given in Nichol's *Calculus*. Three hours per week, throughout the year. Open to students who have taken Course III. Must precede Courses V, VI, and VII.

COURSE V. Astronomy and Mechanics. The texts used are Young's *Manual of Astronomy* and Jessop's *Applied Mathematics*. Three hours per week, throughout the year. Open to students who have taken course IV.

COURSE VI. (a) Solid Analytical Geometry; (b) Differential Equations; (c) Philosophy of Mathematics; (d) Descriptive Geometry. Any one of these may be elected by graduates as a two-hour course running through the year.

COURSE VII. Additional graduate work will embrace some subject of higher mathematical theory or application according to the desire of the pupil. Two hours per week, throughout the year.

Chemistry and Physics

PROFESSOR SMITH.

Chemistry

COURSE I. General Chemistry, inorganic and organic. Three hours per week, throughout the year. Required of all candidates for a degree.

COURSE II. Analytic Chemistry, qualitative and quantitative. Three hours per week, throughout the year. Elective for Juniors and Seniors who have had course I.

COURSE III. Organic Chemistry. Three hours per week, first semester. Elective for Juniors and Seniors who have had course I.

Physics

COURSE I. General Physics, except Optics. Three hours per week, throughout the year. Elective for Juniors and Seniors who have had elementary physics and mathematics through trigonometry.

COURSE II. Optics, and Meteorology, including a general study of the atmosphere, of climate, and of the methods of the United States weather service. Three times per week, second semester. Elective for Juniors and Seniors who have had Chemistry I and Physics I.

Graduate Courses

Additional courses will be provided for students wishing advanced studies in either chemistry or physics.

Biology and Geology

PROFESSOR HOUSE.

It is intended in the following courses that the student shall obtain a general knowledge of the fundamental facts and laws of nature. Stress is laid upon the disciplinary value of careful and proper methods of observation and investigation, as well as the cultural value of becoming acquainted with the common forms of every-day life. The work is done in the laboratory, field, or lecture room as the conditions demand.

Zoölogy

COURSE I. Invertebrate Zoölogy. Type forms of the various groups of invertebrates are studied in the laboratory, aquaria, and field, with reference to their structure, functions, life history, and classification. Pratt's *Invertebrate Zoölogy* is used as a guide in the laboratory, supplemented by text-book, lectures, and assigned readings. Three hours per week, first semester.

COURSE II. Vertebrate Zoölogy. Comparative anatomy of type forms and systematic classification of vertebrate specimens in the laboratory and field. Special attention will be given to the study of the birds, with reference to their identification, classification, and feeding and nesting habits. Laboratory, field, and lectures. Three hours per week, second semester.

Courses I and II are required of all candidates for degrees.

COURSE III. Vertebrate Histology. The more important and recent methods of killing, fixing, imbedding, sectioning, staining, and mounting tissues for microscopic study are practiced by the students. The study and drawing of cell and tissue

structures is a very prominent part of the work. Lectures and laboratory. Three hours per week, first semester.

COURSE IV. Human Physiology. Laboratory and classroom. This course supplements the work of course III. Three hours per week, second semester.

Courses III and IV are open to students who have completed courses I and II.

Botany

COURSE I. Plant Histology and Physiology. This includes the microscopic study of the cells and tissues of the plant, including root, stem, and leaves, and also the principles of nutrition, growth, and reproduction. Laboratory and lectures. Three hours per week, first semester.

COURSE II. Cryptogamic and Systematic Botany. Type-forms of the various groups of cryptogams are studied in the laboratory, field, and aquaria, with reference to structure, life history, and classification. In addition, the analysis and classification of the flowering plants is taken up in the early spring. Three hours per week, second semester.

Mineralogy and Geology

The collections in the museum are admirably adapted to the work in this department. There are about five hundred species of minerals, many of which are duplicated several times. There are also complete sets of fossils and rocks representing type forms of all ages in the earth's development.

COURSE I. Mineralogy. This course includes the study of the laws of crystallography, illustrated by the various forms of natural crystals in the museum and a large collection of models, and laboratory work in the study and determination of minerals, ores, and rock-forming materials, embracing blow-

pipe analysis and the usual chemical tests. First semester, four hours per week in the laboratory and one in the lecture room. Open to students who have passed in Chemistry I.

COURSE II. Dynamical and Structural Geology. Lecture room, laboratory, and field work. The first part embraces the study and description of agents concerned in the modification of land surfaces, such as weathering, erosion, sedimentation, and organic life. The second part deals with the nature and arrangement of the materials of the earth's crust, folding, metamorphism, earthquake phenomena, and mineral veins and ore deposits. Three hours per week, first semester.

COURSE III. Historical Geology. This course involves the study of the history of the earth as shown by the succession and distribution of the rocks of its crust. Fossils are considered the best basis for making out a history of the earth, and the work of the class room is supplemented by a study of the large collection of specimens in the museum and also by collecting and studying the fossils of local formations. Three hours per week, second semester.

Courses II and III are required of all candidates for the B. S. degree, and may be elected by other students who have completed courses I and II in Zoölogy.

*College Professors with work in the Academy.

CENTRAL ACADEMY

Purpose

In addition to the regular college courses, Central College maintains a high-grade Academy under the control of the President and Board of Curators. The primary aim of the Academy is to fit boys and young men for college. For this purpose it offers four-year courses preparatory to the Freshman class, but these courses are broadly educational and are admirably adapted to the needs of those who do not intend to take a college course.

Advantages

The Academy is situated on the Central College campus, and has as its home the building in which all the work of the College was formerly done, known then as Library Hall. The students are in constant touch and association with the regular student body of the College, use the same boarding-places, belong to the same literary societies, the same athletic associations, and the same Young Men's Christian Association. They have access to the College library, and the work in science is done in the College laboratories, under the direction of the Academy instructor. The various religious and educational gatherings common to college communities give students advantages which are very rare and profitable.

Library

Academy students have full access to the regular College library, and in addition have a fairly good working library of reference books in the Academy building. A reading-table is supplied with magazines, newspapers, and other periodicals.

Prizes

The T. G. Mumpower Scholarship Prize. This prize of \$20 was endowed by the sons and daughters of Professor T. G. Mumpower as a memorial of their father. It is awarded for the best general scholarship in the Academy. Students who have part of their work in the College will not be eligible to this prize.

In 1907, this prize was awarded to Herbert Bruner.

The Declamation Prize. This prize is offered by the St. Louis Methodist Preachers' Meeting, and is awarded for the best declamation delivered in the annual contest during Commencement week.

In 1907, this prize was awarded to H. C. Parsons.

Honors

The teachers keep correct class records of all work and prepare quarterly and annual Honor Rolls, which are published and posted in a suitable bulletin, also publicly read during Commencement. An average of 95 shall entitle the student to highest honors; of 90, to honors; of 80, to distinction; of 60, to a pass; of 50, to a condition. Below 50 is considered a failure. Only the names of those who average 80 or more in any given subject will appear on the Honor Roll.

Discipline

Fair, honest, firm government of a school is a necessity. All students are treated and trusted as gentlemen, and they must respond to this treatment.

Students of the Academy are under the authority of the Academy Principal and Faculty. The system of management differs from that of the College, and the wisdom of this course is apparent. Younger students cannot be given the degree of freedom which can safely be granted to older and more mature young men. Oftentimes Academy students are mature young men, but if they are such, they are able to recognize the wisdom

of a strong, firm oversight for those who are not able to use a larger freedom.

A few special regulations are indispensable, such as:

Students must observe study hours; must not keep or carry dangerous weapons; must not drink or keep intoxicating liquors; must not enter any places where such liquors are sold; must not use profane or obscene language; must not abuse school property; must not do anything unbecoming gentlemen.

The school is for students, those who are anxious to study and improve. While no regular recitations are conducted on Monday, the teachers reserve the right to summon students to the Academy on that day for violations of rules or neglect of duty during the preceding week. Anyone who so deports himself as to become undesirable will be discontinued.

Reports

Candid reports are sent to parents at the middle and close of each semester, and the reports thus sent may be strictly relied upon. When students do their duty, parents should help them and us by encouraging them; and when they fail to do their full duty, we urge parents to help us by arousing the students to better efforts in every possible way.

To Parents

We urge that you allow your son to remain to the very last day of the session, as too frequently a year of good work is spoiled by withdrawing the student a few weeks or even days before the session is ended. After we have done our best for him for the greater part of the year, it is very discouraging to us, and generally to him, for that work to be broken up by a too early withdrawal.

We send you frequent reports of him and his work, and we shall give you frank notice of anything which we feel that you ought to know. While your boy is under our care, we are

anxious about him, that he may develop properly and not disappoint you here, and we look to you for such assistance and co-operation as only the parent can give.

Fees

Tuition, each semester	\$20.00
Incidental fee, each semester	6.00
Laboratory fees, for students taking science, each semester. .	1.00
Athletic Association fee	1.50

The incidental fee is required of every pupil, and must be paid at enrollment. No student will be allowed to recite until settlement has been made with the Registrar and an entrance card secured.

No deduction will be made in fees except for tuition in case of absence caused by protracted illness.

New students entering after the first month are charged from the date of entrance; others from the opening of the semester if they advance with their former classes.

ESTIMATE OF COST FOR YEAR IN THE ACADEMY.

	Low.	Liberal.
Tuition and Fees.....	\$ 55.00	\$ 57.00
Boarding.	120.00	160.00
Books, Stationery, etc . . .	10.00	15.00
Laundry.	10.00	15.00
Total.	\$195.00	\$247.00

Terms of Admission

It is very important for students to be present on the day of opening.

The applicant must be at least fourteen years old, and must have completed the work of the eighth grade in some good public school, or its equivalent. Students coming from other schools and claiming credit for work done therein must present a certificate from the authorities of the school attended showing satisfactory records for class-work and good behavior.

Classification

On entering, students are placed by the Principal, in conference with the other teachers, in those classes for which they are prepared. Generally this is done without examination, but in some cases examinations are necessary. Students who are prepared for some of the studies of the College but not for all are allowed to take such College studies if they can do so without postponing uncompleted Academy work. Such students will be ranked as College students only when the amount of their work in the Academy does not exceed two units (see page 38).

Mature Students

The average age of our student body is about twenty years, and a number of our very best students are considerably older. The Academy affords special advantages to young men of maturer years who are really in earnest about securing an education. Although the regular course of study covers four years, arrangement will be made by which students who have not studied Latin, but who are more advanced in other subjects, may complete the course in three years; but to do this the student must maintain in all subjects a specified rank in scholarship.

Amount of Work

Every student is required to take the amount of work indicated by the regular courses of study, unless especially excused by the Faculty.

COURSE OF INSTRUCTION

This course of study is designed primarily to meet the requirements for admission to the Freshman class of Central College. Greek is required in the fourth year for admission to the classical course in the College; German, for the scientific course. Upon satisfactory completion of the academic course, the student is given a Certificate of Graduation attesting that fact.

In the following outline, Arabic numerals indicate number of recitations per week. The recitation period is forty-five minutes.

First Year

LATIN.—Beginner's book; Gradatim	5
MATHEMATICS.—Arithmetic (completed)	3
ENGLISH.—Grammar; compositions; classics. For study: <i>Hiawatha</i> ; <i>Tanglewood Tales</i> ; <i>English Bible</i> . This Register of the Graduates of Central College aims to present a list of the Alumni arranged by years of graduation, and to furnish information in regard to subsequent degrees conferred by Central College; degrees received from other institutions of learning; present address; past and present occupation; and public service performed. To the names of persons known to be deceased an asterisk (*) is prefixed, and, where the information is accessible, the date and place of death are added.

It is the desire of the authorities of Central College, as well as of the Alumni Association, to make this record as complete as possible. To this end, graduates are earnestly requested to send to the Registrar of Central College prompt announcement of changes in addresses and any other information which will serve to improve the list in future editions.

The register includes graduates in schools as well as holders of degrees; where the alumnus is a graduate in schools, the schools are given in italics.

1859

- *S. C. MAJOR, B. S. Died in Fayette, Mo., 1894.
Lawyer; State Senator and Member on Revision Committee State
Constitution, 1876.

1861

- E. R. BARTON, A. B. Denver, Colo.
O. M. HARRISON, B. L. Glasgow, Mo.
Farmer and Miller.
*F. M. HENDRIX, A. B. Died 1880.
Lieutenant U. S. Navy.
R. F. LUCKETT, A. B. Weingarten, Mo.
DAVIS RATHBURN, A. B.

1871

- J. L. CARLISLE St. Louis, Mo.
Moral Philosophy. Postmaster at St. Louis during Cleveland's admin-
istration. Sometime Curator of Central College.
*HIRAM D. GROVES. Died in Kansas City, 1905
Moral Philosophy, Mathematics. D. D., 1903. President of Howard-
Payne College, 1888-1905.
JOHN G. PORTER. Lamar, Mo.
Mathematics.
JAMES L. TAYLOR. Breckenridge, Mo.
Moral Philosophy, Mathematics.
HARVEY S. TUCKER. Marshall, Mo.
Mathematics.

1872.

Moral Philosophy; A. B. and A. M., 1905. Principal of the De Witt
Clinton High School.

- T. F. DIMMITT. San Saba, Tex.
English Literature. Farmer.
- D. H. EBY, Ph. B. Hannibal, Mo.
 Judge Tenth Judicial District.
- *F. X. FORSTER.
Moral Philosophy, English Literature.
- J. T. FORSTER, A. B. Lineville, Ia.
 Merchant.
- S. H. MILAM. Jonesburg, Mo.
Moral Philosophy, Mathematics. Member of Missouri Conference.
- J. W. ROUSE. Bucklin, Mo.
English Literature. Banker.
- JOHN F. SHAFROTH. Denver, Colo.
Mathematics. Graduate of the University of Michigan, 1875. Member of Congress from Colorado, 1895-1903.
- J. R. A. VAUGHAN, A. B.; A. M., '73. St. Louis, Mo.
 Principal Central Academy, 1872-73; Member of Missouri, Denver and St. Louis Conferences; Curator of Central College; Presiding Elder of De Soto District, St. Louis Conference.
- E. W. WOODWARD. Neosho, Mo.
Moral Philosophy.

1873

- T. H. CARSKADDEN Dalton, Mo.
Moral Philosophy. Farmer.
- *N. G. ELLIOTT. Died—
German. Farmer.
- J. P. GODBEY, Ph. B. Forest City, Mo.
 Member of Missouri Conference.
- W. W. GRAY Fayette, Mo.
Moral Philosophy.
- H. M. McKNIGHT
Moral Philosophy. Member of Pacific Conference.
- C. F. MASON
English Literature.
- B. J. MILAM Oklahoma.
Moral Philosophy, English Literature, Physical Science.
- WINFIELD MILLER Richmond, Mo.
Moral Philosophy.
- *T. G. MUMPOWER, A. M. Died in Florida, 1892.
 Member of Missouri Conference; Adjunct Professor of Greek and Latin, Central College; Principal of Central Academy, 1881-91.

- J. A. POAGE, A. B.
 G. W. ROBERTSONMexico, Mo.
English Literature. Merchant.
 J. L. ROOT
English Literature, Physical Science.
 R. S. WILSONSweet Springs, Mo.
Moral Philosophy, English Literature, Physical Science. Physician.

1874

- W. C. ARLINE, Ph. B.St. Louis, Mo.
 Principal of Central Academy, 1875-78; Lawyer.
 OLIN BRINKERDenver, Colo.
German.
 E. M. FORSTERHuntsville, Mo.
English Literature, German. Merchant.

President of Kwansai Gakuin. Presiding Elder, St. Louis district.

1906

- JOSEPH H. COWHAM, LL. D.London, England
Lecturer on Education, College at Westminster.

CORRELATED SCHOOLS

CENTRAL ACADEMY

(Woodson Institute)

Richmond, Mo.

W. M. BOARD, *Principal.*

H. F. IVY, *Principal-elect.*

Historical Statement

Woodson Institute, Richmond, Mo., is named in honor of the late T. D. Woodson, Esq., who contributed generously to its foundation. Recently, in obedience to the action of the Missouri Conference, and by an agreement with the trustees of Woodson Institute, the property passed to the control of Central College trustees. It is now correlated with that institution. Should the graduates of Woodson Institute desire to receive a full college course, they may, without interruption, continue their work at Central.

Location

Richmond is a flourishing city of nearly 4,000 inhabitants, situated on the St. Joseph branch of the Santa Fe Railway and about forty miles east of Kansas City. Woodson Institute is located in the eastern part of the city on a commanding site. The building is lighted throughout by electricity and heated by steam.

Electives

Since many of the pupils of the Academy will wish to prepare for teaching in the public schools, arrangements will be made for giving instruction in such subjects as may be necessary, in addition to the regular course.

Expenses

All bills must be paid in advance, and no pupil will be allowed to matriculate until his bill is paid or a satisfactory arrangement is made with the Principal.

No pupil will be received for a shorter time than one term unless by special agreement. In case of absence for as much as four weeks on account of sickness or from any other unavoidable cause, a proportional part of the tuition will be refunded; provided, however, no deduction will be made for the first two or the last four weeks of any term, nor in case of dismissal.

Home Department

The Home Department will be under the immediate care of the Principal, assisted by a carefully selected Matron. Every effort will be put forth to make this a home indeed as to comfort and convenience.

For information, address

H. F. IVY, *Principal*,
Richmond, Mo.

CENTRAL ACADEMY

(Centenary Academy)

Palmyra, Mo.

REV. JAMES A. LANIUS, *Principal*.

Location

Palmyra is the county seat of Marion County, Mo. The Hannibal & St. Joseph Railroad brings it into close connection with the Burlington system, of which it is a part. Its proximity to Hannibal and Quincy, and its railroad connections with them, make it easily accessible to all railroad and river points in eastern Missouri and western Illinois.

The buildings are of brick and consist of a large school building, with capacity of 300 pupils, and a well-built "Academy Home" for young ladies. This last is lighted by electricity and heated by steam, and has all the equipments of the best boarding schools for young ladies.

Special Rate for Boarding Pupils

A flat rate of \$170 to cover cost of board, tuition, music (one kind), and use of piano for daily practice, or \$140 without music, will be made to pupils who enter for the entire year; but if from any cause such pupils should leave before the end of the year, they will be charged catalogue rates for the time they may have attended. These rates are very low, and are not duplicated by any young ladies' boarding-school in the state. The numbers are limited to twenty, and the low rates are made with the confident expectation that every place will be taken at an early day. Bills must be paid in advance or when called for.

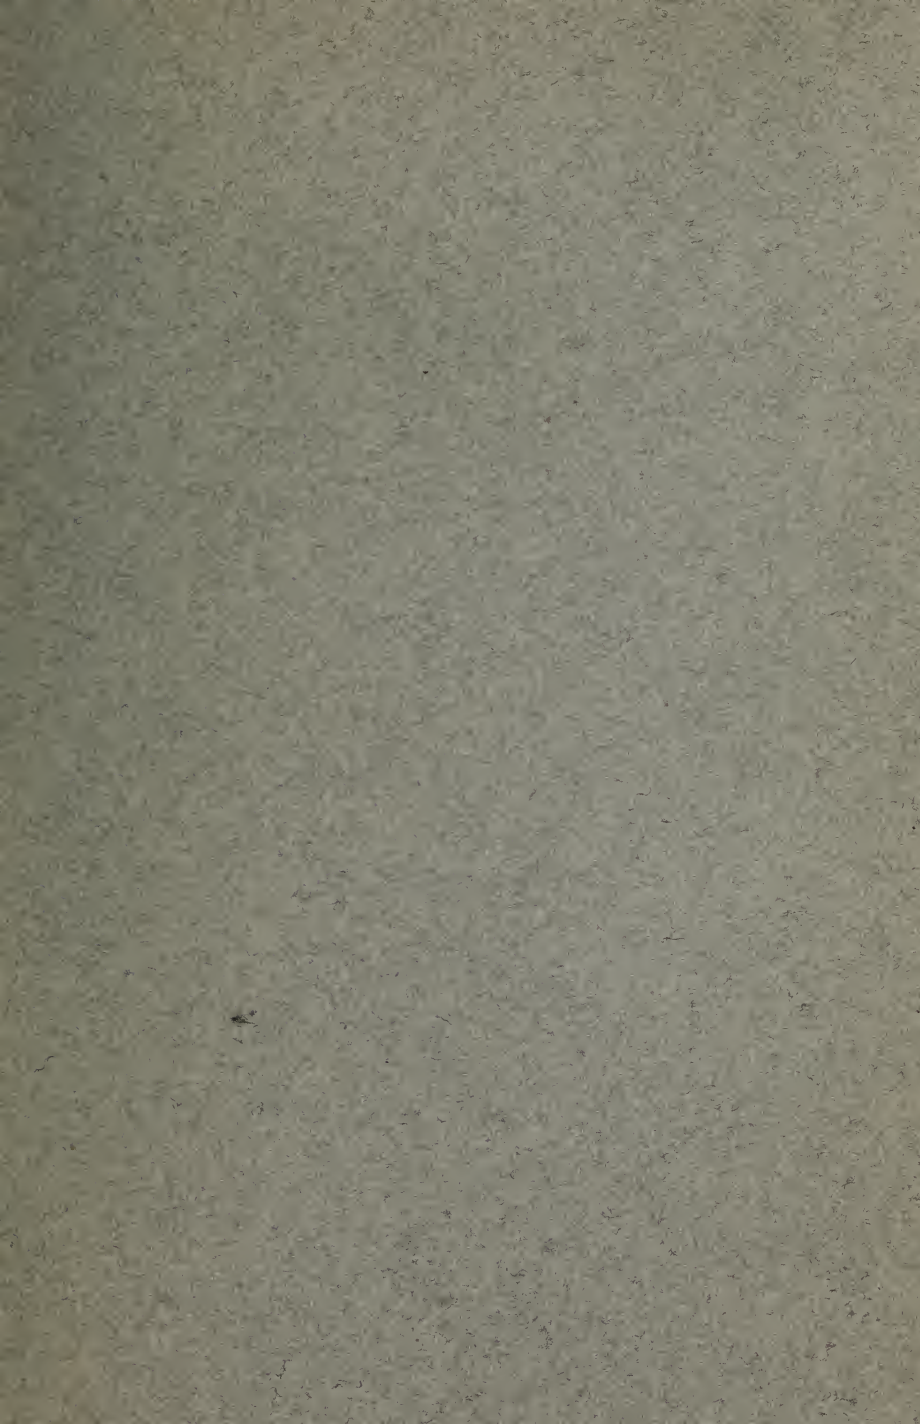

For Catalogue and further information, address

JAS. A. LANIUS, *Principal*.
